

Scenario: You are a USC student living at Park Place and you need to get to your class at the Swearingen Engineering Center but you overslept. You download the Don't Miss The Bus App to find the next bus.

Task 1: Find the Bus that will get you to the Swearingen Engineering Center

Task 2: Check the app to see if that bus has open seats

Task 3: While on the bus check to see when your stop will be on the app to see if you will make it to your class on time

What changes should you make for your application?

Way to find if the bus is handicap accessible

Add a way to see the buses current location

Add a feature to show how far you are from your destination(miles/feet)

What do you need to keep for your application?

ETA

Map

List of Upcoming Stops

Number of available seats
